First Star Capital Announces Three Working Capital Programs

San Francisco Bay Area based commercial equipment leasing and financing firm, First Star Capital has recently added three types of Working Capital programs: Merchant Cash Advance, Accounts Receivable Factoring, and Purchase Order Financing. This addition expands their current financing and leasing programs, with programs specifically designed for small-to-medium sized businesses that face the growing pains of cash-flow and liquidity strain.

“Throughout the past year we have seen increasing demand for Working Capital programs,” said Brad Harmon, CLP, president of First Star Capital. “Listening to our customers, we have been very diligent to create some of the most competitive Working Capital programs available.” Announcing the allocation of significant funding resources and personnel to these new programs, First Star Capital wishes to meet customer demand.

Accompanying the programs is a redesigned dedicated Working Capital webpage. “This webpage has been carefully designed to quickly educate, inform, and connect our customers to their specific working capital needs,” stated Brad Harmon, CLP. The working capital page contains all the necessary information and documents, allowing for First Star Capital to have pre-approval turnaround time of approximately 24 hours.
